1. **Identification of the substance / Preparation and Company:**

   Identification of the substance or preparation:
   - Commercial product name: Aluminium Oxide

   Company / Manufacturer:
   - ERNST HINRICHS Dental GmbH
     Borsigstr. 1
     D - 38644 Goslar
     0 53 21 / 5 06 24
     0 53 21 / 5 08 81
     info@hinrichs-dental.de / www.hinrichs-dental.de

2. **Hazards identification**

   2.1 Classification:
   - Not applicable.

   2.2 Label elements:

   Safety instructions:
   - Possible dust exposure due to fine dust particles.

   2.3 Other hazards:
   - Not known.

3. **Composition/information on ingredients**

4. **First aid measures**

   4.1 Description of first aid measures:
   - General information:
   - After inhalation: Consult a doctor in case of health disorders. Provide the affected person with fresh air. Consult a doctor in case of irritation in of the respiratory tract.
After eye contact: Remove contact lenses and rinse the eyes with open eyelids for 10 minutes under running water. If necessary, consult an ophthalmologist.

After skin contact: Wash with water and rinse.

After swallowing: Rinse mouth and drink plenty of water. Do not induce vomiting. If you feel unwell, seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed: Not known.

4.3 Indication of any immediate medical attention and special treatment needed: Treat symptomatically.

5. Firefighting measures

5.1 Extinguishing media
Suitable extinguishing media: Product does not burn. Match extinguishing measures to ambient situation.

Unsuitable extinguishing media: Not known.

5.2 Special hazards arising from the product: Not known.

5.3 Advice for fire fighters: Match the firefighting measures to the environmental conditions.

Additional information: Not known.

6. Accidental release measures

6.1 Personal precautions: Avoid dust formation.

6.2 Environmental protection measures: Not known.

6.3 Methods and materials for containment and cleaning up: Pick up mechanically and dispose of properly.

6.4 Reference to other sections: Refer to protective measures in section 7 and 8.

Additional information: Not known.

7. Handling and storage

7.1 Precautions for safe handling:
Information on safe handling: Avoid dust information.
Information on fire and explosion protection: No special fire protection measure
Additional information: Not known.

7.2 Conditions for safe storage, including any incompatibilities
Information on storage conditions: Always store product in dry conditions.
Requirements for storage rooms and containers: No special requirements needed.

Storage class VCI: LGK 13 (non-combustible solids)

7.3 Specific end uses: Aluminium oxide is used to manufacture or to use as blasting or abrasive medium.

8. Limitation and monitoring of exposure/ personal protective equipment

8.1 Control parameters
Occupational exposure limit values in the workplace and/or biological limit values
Occupational Exposure Limits (OEL) in Germany for dusts

Inhalable fraction (E) 10 mg/m²
Respirable fraction (A) 1,25 mg/m³
With exceeding factor 2 each, re. TRGS 900
Community exposure limits Country specific. Please inquire in individual cases.
Appropriate engineering controls:
Technical measures and the application of suitable work processes have priority over the use of personal protective equipment.
Provide adequate ventilation. This can be achieved by local suction or general extraction.
Aluminium oxide is not a hazardous substance, thus only the general dust limit value applies.
Suitable assessment methods to verify the effectiveness of the protective measures taken include metrological and non-metrological determination methods as described in the Technical Rules for Hazardous Substances (TRGS) 4032 and BS EN 14042 “workplace areas, Guidelines for the implementation and application of processes for assessment of exposure to chemical and biological agents”.

Personal protective equipment: The use of personal protective equipment is dependent on the concentrations and quantity of hazardous substances in their execution in specific workplaces.

Respiratory protection: Normally, no personal respiratory protective equipment is necessary. In case of insufficient ventilation or exceeded workplace limits, a protective breathing mask should be worn (FFP filtering half mask depending on the existing concentration).

Hand protection: Glove material: Leather
Body protection: With normal use, no body protection by half or full-body coverall and boots is required.

Information on industrial hygiene: Minimum standards for protective measures when handling working materials are listed in TRGS 500.
Do not eat, drink, smoke or take drugs while using this product. Avoid contact with skin, eyes and clothing.
Remove soiled or soaked clothing immediately. Wash hands before breaks and at end of work.
Protect skin by using skin creams.

Environmental protection measures: See sections 6 and 7; no further action is required.

9. Physical and chemical characteristics
9.1 Information on basics physical and chemical properties

Appearance: angular
Physical state: solid
Colour: white / pink / brown
Odour: odourless

Safety data:
Explosion hazard: The product itself is not explosive; however, formation of explosive air/dust mixtures is possible
Lower explosion limit: not known
Upper explosion limit: not known
Vapour pressure: not relevant
Specific gravity: approx. 3.9 to 4.1 g/cm³
Flow time: not relevant
Water solubility: insoluble in water
pH value: not applicable
Boiling point/range: not applicable
Flash point: not determined as product is not flammable
Melting point: approx. 2 000 °C
Ignition temperature: not determined as product is not flammable
EU – Safety Data Sheet

According to the REACH Regulation (EC) No. 1907/2006
Date of issue: 17.11.2015
Printing date: 11.01.2016
Aluminium Oxide

The information about the explosion limits refers to Aluminium oxide. Please refer to the technical data sheet for other physical and chemical data.

9.2 Other information: None.

10. Stability and reactivity

10.1 Reactivity: Aluminium oxide is non-reactive and does not change with proper handling and storage.

10.2 Chemical stability: Aluminium oxide is chemically stable and does not change with proper handling and storage.

10.3 Possibility of hazardous reactions: No hazardous reactions known.

10.4 Conditions to avoid: No decomposition if used according to specifications.

10.5 Incompatible materials: No hazardous reactions known.

10.6 Hazardous decomposition products: No known hazardous decomposition products.

11. Toxicological information

11.1 Information on toxicological effects: According to current IFA reports the product contains silicosis-inducing, toxic and carcinogenic components. The indications given in section 8 of this product information must be observed.

Acute toxicity: No data on the product available.
Irritation: No data on the product available.
Corrosivity: No data on the product available.
Sensitisation: No data on the product available.
Repeated dose toxicity: No known toxicity of Aluminium oxide.
CMR effects (carcinogenic, mutagenic and toxic to reproduction): No known carcinogenic effect according to IFA reports.

Summarised evaluation of the CMR properties:
Practical experience (relevant for classification and other observations):
Carcinogenicity: No known carcinogenicity of Aluminium oxide.
Mutagenicity: No data on the product available.
Reproductive toxicity: No data on the product available.
Other information: Not known.

12. Environmental information

12.1 Toxicity: No known effects.
Ecotoxicity: For Aluminium oxide no environmental problems are to be expected when handled and used properly.
Fish toxicity: Harmful effects for aquatic organisms are not expected.
Aquatic invertebrates: Harmful effects for aquatic organisms are not expected.
Water plants: Harmful effects for aquatic organisms are not expected.

12.2 Persistence and degradability: Based on current experience, this product is inert and not degradable.

12.3 Bioaccumulation potential: No data available. Accumulation in biological materials is rather unlikely, as it is inert and insoluble.

12.4 Mobility in soil: Potential not known.

12.5 Results of PBT and vPvB assessment: Not relevant. The substances in this product do not meet the criteria for classification as PBT or vPvB.

12.6 Other harmful effects: Not known.
13. Disposal considerations

13.1 Waste treatment methods:
Product: Aluminium oxide. If recycling is not possible, waste must be disposed of in compliance with national and local regulations. Confirm the exact waste code with the disposer.

Waste Code according to European Waste Catalogue (EWC):
12 01 17 waste blasting material other than those mentioned in 12 01 16.

13.2 Packaging:
Contaminates packaging: National and local regulations must be followed.
Cleaned packaging: Packaging can be reused after being cleaned or recycled.

14. Transport information
Aluminium oxide is no dangerous good.

15. Regulatory information

15.1 Safety, health and environmental regulations / legislation specific for the product.
EU regulations: Not known.
National regulations: Not hazardous to water, classification according to VwVwS, Annex 4.

Technical instruction on air quality (TA-Luft):
Hazardous Incident Ordinance (12. BlmSchV [German Federal Immission Control Regulation]): Substance not mentioned by name.
Solvents Ordinance (31. BlmSchV [German Federal Immission Control Regulation]): Substances not mentioned by name.
Chemicals Prohibition Ordinance: Substances not mentioned by name.
Relevant Technical Rules for Hazardous Substances:
Employment Restrictions: Not known.
Miscellaneous: Aluminium oxide is not subject to the VOC Regulation.
International regulations: All Aluminium oxide ingredients are listed with TSCA, AICS, DSL (NDSL), NEPA and PICCS and registered with MITI / ENCS under 1-23.

15.2 Chemical safety assessment: Not relevant.

16. Other information

Further applicable EC directives: Not known.
Restrictions on use recommended by the manufacturer: For industrial applicate only.

Other Information:
The product information in this documentation is correct to the best of our knowledge at the time of printing. The information is intended to provide you with advice on the safe handling of the product mentioned in this product information for storage, processing, transport and disposal. The information cannot be applied to other products. If the product mentioned in this documentation is in anyway tampered with i.e. mixed with other materials, processed or undergoes processing, the information as supplied in this document no longer applies to the new product unless expressly stated otherwise.

Changes since the last version

Literature and data sources

Regulations:
CLP Regulation (EC) No. 1272/2008
Hazardous Substances Ordinance (GefStoffv)
Commission Decision 2000/532/EC (AW)
Transport Regulations according to ADR, RID and IATA
TRGS 900
VOC Regulation (OiemVOCFarbV)

Hazard statements, referred to in section 2 and 3 according 1D Regulation (EC) No. 1272/2008: None.

The above information is based on the present state of knowledge; however, this shall not constitute a guarantee of product properties and establishes no contractual legal rights. Existing laws and regulations must be strictly followed by the recipient or user of the blasting medium on their own responsibility.
